Academic Projects

Home Haven	June 2024 – July 2024

Tools: HTML, CSS, Javascript

Created a responsive website called Home Haven, designed to provide real estate listings and property details.

Features:

- **Responsive Design:** Ensured the website works well across different devices and screen sizes.
- **Search Functionality**: Developed a search feature allowing users to filter properties based on criteria like location, price range, and property type.
- **Property Details:** Displayed comprehensive details for each property, including descriptions, images, amenities, and contact information.
- **Contact Forms**: Implemented forms for users to inquire about properties or schedule viewings.
- **User Authentication:** Allowed users to create accounts, save favorite listings, or receive alerts for new listings matching their criteria.
- <-GitHub-source-code->, <-Project-Live-Link->

Task Nova	June 2024 – July 2024

Tools: HTML, CSS, Javascript

A responsive to-do list web app created with HTML, CSS, and JavaScript. Enables dynamic task management, prioritization, and localStorage for efficient organization and user-friendly design.

Responsibilities:

- **Task Management:** Enables users to create, edit, and delete tasks.
- **LocalStorage**: Stores task data locally for persistent use without requiring backend services.
- **Dynamic Updates**: Provides real-time updates and changes to task lists.
- **Task Categories**: Allows users to categorize tasks (e.g., work, personal, etc.) for better organization.
- **Completion Tracking:** Tracks task completion status and provides visual feedback.
- <-GitHub-source-code->, <-Project-Live-Link->

Extracurricular Activities

- **E-Cell Member**
  - Actively participated in workshops and events focused on entrepreneurship.
  - Collaborated with peers on business ideas and innovation projects.
  - Developed skills in leadership, teamwork, and creative problem-solving within a startup environment.
